

Accordion Shutters - Bertha High Velocity System

The Bertha High Velocity Folding Accordion shutter is the most economical and feature packed shutter available on the market today.

Key Features:

- All Extruded Aluminum Construction
- 5-Point Locking Security System
- Silicone Impregnated Wheel Carriages
- Xylem Coated and Stainless Steel Hardware
- 4/5 Standard Colors
- Economical
- Dade County Approved Designs Available
- Mechanically Bent radius tracks to fit any shaped balcony
- Built to withstand hurricane force winds
- Encloses entire balconies with one shutter
- Protect patio doors from rain damage
- Improved Stacking
- More Coverage per Blade
- Fastest Assembly and Installation
- Reduced "footprint" for balcony enclosures

The Vertical Interlocking Blade system gives stability and strength even in the worst possible weather conditions. Each Blade interlocks into the next with a sure locking design and are made from Heavy Duty Extruded Aluminum.

Benefits:

- Accordion Hurricane Shutters are permanently installed for year round protection.
- They fold back compactly similar to a louvered door and are one or two piece shutters.
- They are installed in front windows and doors, balconies, and large patio openings.
- Accordion Shutters are convenient, and easily close. They lock from the inside or outside for increased security and protection.
- Accordion Hurricane Shutters are made of aluminum and should be cleaned and lubricated yearly.
- Accordion Shutters are considered one of the strongest shutters available.

- A Special 90° Corner Mate is available to exactly fit your balcony and not take up valuable floor space.
- The new Big Bertha HV features Hurricane Protection for residential and commercial applications.
- The two-blade system is highly versatile and allows flexible use of components for both commercial and residential Hurricane Shutter Systems.

Approval Numbers:

These Accordion Shutters have been tested to meet or exceed the most stringent requirements for Hurricane Shutters in the industry, such as:

- Florida Building Code (FBC) Non HVMZ
- Florida Building Code (FBC) HVMZ
- Dade and Broward
- International Building Code (IBC)
- International Residential Code (IRC)
- Texas Department of Insurance (TDI)
- Miami-Dade County
